HELLO, WORLD! I AM

João Rodrigues

Web Development · System Architecture · AI ...

01 Profile

Transforming logic into real solutions since **2014**. With solid experience in web development since **2019**, I help build scalable systems, secure architectures, and consistent digital businesses.

Currently in the **3rd semester of a B.S. in Software Engineering** at Jala University, deepening my system-architecture skills and the corporate back-end ecosystem. My daily focus is writing clean code, designing performant systems, and continuously growing in **Artificial Intelligence**, delivering solutions that keep up with the state of the art.

02 Professional Path

2025 — PRESENT

Learning AI & Tooling · Continuous Learning

Studying and applying modern LLMs and integrating AI tools, keeping up with rapid technological advancements.

2025 — 2029

B.S. in Software Engineering · Jala University

3rd semester, focusing on back-end development, design patterns (Repository Pattern, DTOs), and data modeling.

2022 — PRESENT

Robust Back-end · APIs & Data

Advanced business rules, APIs, and data handling with Java, Spring Boot, and PHP, focused on security, cryptography, and efficiency.

2019 — PRESENT

System Creation & Maintenance · Web Development

Development of custom solutions for the digital management and operation of companies and diverse clients.

2019 — PRESENT

E-commerce & CMS · Platforms

High-performance virtual stores and dynamic portals built with OpenCart, WordPress, and Joomla.

2014 — 2019

IT Technician (High School) · IF Campus Salgueiro

Foundations in programming, logic, and infrastructure.

PORTFOLIO

Selected Work

UNIVERSITY PROJECTS

ModuTask

CLI-based task management system developed as a Capstone (Sprint) project. Focus on layered architecture and data security.

- Java
- MongoDB
- AES Encryption
- Service Layer

WEB APPS & E-COMMERCE

Virtual Store — Client X

Complete e-commerce development, payment gateway configuration, and virtual storefront speed optimization.

- OpenCart
- PHP
- MySQL
- Bootstrap

BACKEND & ARCHITECTURE

Internal Management API

RESTful API using the Repository pattern, DTOs, and rich domain structuring to guarantee the integrity of business rules.

- Java
- Spring Boot
- PostgreSQL
- Docker

03 Tech Stack

● Back-end & Logic

- Java
- Spring Boot
- PHP
- Python
- C++
- C#

● Databases

- MongoDB
- MySQL
- PostgreSQL
- NoSQL

● Web Ecosystems

- WordPress
- WooCommerce
- Joomla
- OpenCart
- cPanel

● Front-end & UI

- HTML
- CSS
- JavaScript
- Bootstrap
- React

● Infra, DevOps & Tools

- Docker
- Git
- GitHub
- GitLab
- CLI (Linux)
- Figma
- PlantUML
- Supabase
- Firebase
- LLM

● Methodologies

- Scrum / Agile
- Version control
- Clean Code
- Repository Pattern
